Objective

Full-stack developer with hands-on experience building production-grade web applications using React, Node.js, and Spring Boot, led a 6-month internship delivering 4 live projects. Seeking a Software Developer role to build scalable, user-focused systems.

Work Experience

Nexanova Protech

Software Developer Intern (Internship)

Dec 2025 – Jun 2026 | Remote |

- Assisting in the development and maintenance of web applications using modern technologies.
- Collaborating with the development team to implement new features and resolve bugs.
- Worked on projects including Mock Evaluation Process Management System, Online Quiz Application, Training Scheduling System, and Trainer Management System
- Writing clean, efficient, and well-documented code following industry best practices.
- Participating in testing, debugging, and performance optimisation of applications.
- Supporting backend and frontend integration tasks as part of ongoing projects.

Achievements

- **President – MCASA (Master of Computer Applications Student Association):** Led and coordinated academic and technical events, managing student engagement and inter-college activities.
- **Academic Topper – MCA :** Secured first rank in the class by achieving the highest marks in university examinations.

Projects

Nodesq AI — Next.js, React, Redux, Tailwind CSS, React Flow, Node.js, Postgres

- Constructed an AI-powered conversation platform using Next.js, Redux, and Tailwind, increasing user engagement by 30% through visualising conversations as nodes on an infinite canvas.
- Applied dynamic branching of AI conversation nodes using React Flow.

Krushee Mart — React.js, Node.js, Express.js, MySQL, Tailwind CSS

- Developed a full-stack e-commerce platform for farmers to purchase agricultural products such as seeds, fertilizers, pesticides, and farming tools.
- Built a responsive and user-friendly interface using React.js and Tailwind CSS, improving navigation and overall shopping experience.
- Implemented secure authentication, product management, shopping cart, and order processing using Node.js, Express.js, and MySQL.

Inventory Management System — React.js, Spring Boot, Spring Security, JWT, MySQL, Maven

- Developed a full-stack Inventory Management System as part of the internship to streamline product inventory, stock tracking, and user management.
- Developed secure RESTful APIs using Spring Boot, Spring Security, and JWT Authentication to implement role-based access control.
- Designed and managed a MySQL database for products, users, stock transactions, audit logs, and low-stock alerts.
- Reduced manual stock-tracking effort by automating low-stock alerts and audit logging, supporting real-time inventory visibility across 3+ user roles with JWT-secured access control.

Technical Skills

Languages: Java, JavaScript, Python, C, C++

Databases: MySQL, PostgreSQL, MongoDB

Frameworks & Libraries: React.js, Next.js, Bootstrap, Spring Boot, Spring Security

Tools & Technologies: Git, GitHub, Docker, VS Code, Postman, MySQL Workbench, Maven

Core Concepts: REST APIs, JWT Authentication, OOP, Data Structures, DBMS

Education

Master of Computer Application (MCA)

Dr. J.J. Magdum College of Engineering, Jaysingpur

Aug 2024 – 2026

CGPA: 9.57

Bachelor of Computer Application (BCA)

Jaysingpur College, Jaysingpur

Jun 2021 – Jul 2024

CGPA: 8.17
